Technical Skills

- | | |
|---------------------------|---|
| · JS Framework | - React.js, Angular, Vue, Next.js |
| · PHP Frameworks | - Laravel, CodeIgniter |
| · Languages | - PHP, JavaScript, TypeScript, Python |
| · Database | - MYSQL, MongoDB, Cloud Firestore, Postgres SQL |
| · User Interface | - CSS, SCSS, Tailwind CSS |
| · Servers | - Node JS, Apache, AWS, Google Cloud |
| · Server Infrastructure | - AWS, Google Cloud |
| · Mobile App Development | - React Native |
| · Desktop App Development | - Electron JS |
| · Version Control Tools | - Github, Bitbucket, Gitlab |
| · Blockchain | - Web3.js, Solana, Polygon, Solidity Smart Contract |
| · Workflow | - n8n |

Experience

- **DxDy (SmallAxe (Pvt) Ltd) (Lead Front End Developer) (2019 - Onwards)**
 - Developing Web applications with React JS, Vue JS, Next JS, and Laravel.
 - Server management on AWS (Amazon Web Services) with Apache, MySQL, MongoDB, and Node.js
 - Developing mobile apps using React Native with Node JS and REST API.
 - <https://bfplny.com/> (Brookfield Place New York)
 - <https://www.causewaycap.com/> (Causeway Capital Management)
 - <https://worldbicyclerelief.org/>
 - <https://koachhub.com/>
 - Key Achievements:*
 - Developed and maintained a React Native application for Android and IOS
 - Build a video gallery that supports video streaming.
 - Conducted research and development in human body tracking using AI.
 - Conducted research and development in Blockchain data storage and IPFS file storage.
 - Improved the continuous delivery pipeline of the application using automation tools. (CI/CD)
- **Ceffectz (PVT) LTD (Full Stack Engineer) (2017 - 2019)**
 - Successfully Integrated Laravel and Electron JS framework into the company's existing software projects.
 - Developing eCommerce and CRM systems using the Laravel Framework.
 - Installing and setting up Apache, MySQL, MongoDB, and Node.js on Linux servers.
 - Developing mobile apps using react native with Node JS and REST API.
 - <https://www.parkmeapp.com/pmameter/> (Laravel, MYSQL, CRM System, REST API)

- <https://videowindow.com/> (Customer relationship management System)
- <https://trackiex.com/> (E-commerce System)
- <http://career141.com/> (Internal CV Management System)
- **Ozone Desk (PVT) LTD (PHP Developer) (2016 - 2017)**
Developing Ozone Desk Customer Relationship Management & e-commerce platform.
 - <https://ozonedesk.com/> (PHP, MYSQL, REST API)
- **MEDIASOLVE (PVT) LTD (2015– 2016)**
Set up a Smarty framework and redesigned Autolanka.com with SMS and Payment gateways.
 - <http://www.autolanka.com/> (PHP, MYSQL)
- **Lily Digital (PVT) LTD (2011 - 2014)**
Developing CMS using Vanilla PHP.

Education

- BCS Higher Education Qualifications at ESOF Computer Studies Pvt Ltd Colombo. APR 2012 – APR 2013
- Certificate Course in Web Application Development at National Institute of Business Management, Colombo. SEP 2011 – JAN 2012

Other Experience

Edenlans is an open-source metaverse Ecosystem (<https://edenlans.com/>):

- **Description:** Managed the front-end team by contributing to [HashLips NFT](#), an open-source project that runs on the Ethereum (ETH) blockchain.
- **Role:** Front-end Team Manager
- **Skills:** Ethereum blockchain, front-end development, team management
- **Impact:** Successfully led the front-end team to deliver features and improvements that enhanced the overall user experience of the platform.

Gameplex, a Launcher for Web3 Games:

- **Description:** Implemented an open-source project that runs on the Solana blockchain network, as both a front-end developer and blockchain developer.
- **Role:** Front-end Developer & Blockchain Developer
- **Skills:** Solana blockchain, front-end development, blockchain development, file transfer using the torrent protocol
- **Impact:** Developing features and improvements in the project's front-end and blockchain components, resulting in a more robust and user-friendly platform.

On-Chain.ID (<https://testnet.on-chain.id/>) win Hackathon (3rd place):

- **Description:** This project is an MVP submitted to the "Keep it Confidential: The Sapphire Hackathon" event by the OASIS Network. The event's goal is to promote the development of new applications on their revolutionary new EVM-compatible chain.
- **Role:** Front-end Developer & Blockchain Developer
- **Skills:** Solana blockchain, front-end development, blockchain development
- **Impact:** Developed a winning solution using the Ethereum blockchain, showcasing the ability to create innovative solutions in a fast-paced and competitive environment.

Coreum & XRP Ledger NFT Marketplace (<https://bids.com/>)

- **Description:** This project is about building an NFT marketplace for the Coreum and XRP networks from the ground up.
- **Role:** Front-end Developer
- **Skills:** Figma, front-end development
- **Impact:** Developed a responsive and efficient web application using Next.js, focusing on the optimal user experience through fast load times and smooth interactions. Implemented mobile-friendly designs to ensure seamless adaptation across various screen sizes and devices. Utilized Next.js features such as server-side rendering and static site generation to enhance performance and improve SEO outcomes

Interests

- Contribute to open-source projects.
- Doing experiments using machine learning and artificial neural networks.
